DARK LIGHT DRIVER BOX

Designed in Europe to meet the demanding requirements of urban living and industrial applications. The Dark Light driver box is a solid and robust box in which the drivers are well protected. The box is specially designed so that the installer can easily access the connections without having to open the entire box. Ideal in high and demanding locations.

The Dark Light driver box is ideal for use with our Dark Light series. The driver box can be connected to the lamp but can also be placed remotely.

DARK LIGHT DRIVER TRAY

Designed in Europe to meet high demands in dimensions, safety and installation. The Dark Light driver tray is a sturdy and simple tray on which the drivers are mounted well and easily. The tray has been specially designed so that the installer can easily access the connections without having to open the entire box. In addition, the drivers can easily be exchanged in the event of a defect.

The Dark Light driver box is ideal for use with our Dark Light series. The use of the driver tray is ideal for light poles around sports fields. In addition, the DarkLight Driver tray is of course also suitable for industrial applications. The DarkLight Driver Tray has been developed to fit both existing and new poles.
